

# ACCESS AND WATER SUPPLY WORKSHEET

THIS SECTION IS MEANT TO SERVE AS INFORMATION FOR THE COMPLETION OF WORKSHEET

The purpose of this worksheet is to provide the Building Official with a recommendation for access and water supply for the referenced project. The Fire Agency is acting as a consultant and does not have the authority to require any elements of the building permit. It is within the authority of the Building Official to accept or deny any or all elements of this recommendation.

When filling out this document, please be as complete with the information that is being requested as possible. The information provided on the reverse side will allow the local Fire Authority to review the project for adequate access and water supply needs. Each project is reviewed separately and is no way all-inclusive for any future projects. Future projects or phases not declared at this time will be evaluated at the time of application. Please consult your local authority (listed below) if you have any other questions.

All projects will receive a review and corresponding results for each project. If you opt for alternate methods and means for compliance, the building official will need to be consulted on the requirements of what will need to be provided for a proper review. If changes are made to the project after a review has been completed, another review will need to be conducted by the local Fire Authority.

Fire Agencies in Benton County use the Linn Benton Fire Protection Standard as a guide for access and water supply. You can contact your local Fire District for a copy of the standard.

## Instructions:

1. Include plot plan (See Benton County Building permit requirements)
2. Show any adjacent buildings that are within 50' of the proposed project.
3. Show access for project. New driveways may require a permit. Include plan for approach off public road if applicable.
4. Fill out Access and Water Supply Worksheet.
5. Contact your local Fire Authority to complete documentation required for a building permit application.
