TIMELINE

Construction to occur Summer and Fall of 2022. Estimated construction cost - \$1,600,000. Funding Sources: County Road Funds

STATUS

Under Construction. Construction will span June 17th to September 2nd, 2022.

BACKGROUND

In 2015, the City of Albany and Benton County revised their existing Jurisdictional Road Transfer Agreement. There are numerous County roads located within the City Limits that make sense to transfer to the City of Albany for maintenance. The agreement to transfer Gibson Hill Road included the County making some pedestrian upgrades and resurfacing the road.

Gibson Hill Road Sidewalk Infill & Pavement Restoration

This project will grind the existing asphalt surface by 2-inches and replace it with new asphalt at the same depth from the roundabout at North Albany Road to Scenic Drive.

The County will also install sidewalk facilities on the north side of Gibson Hill in compliance with ADA standards and replace/install storm drainage facilities. The new sidewalk will be from Thorn Drive to Laura Vista Drive, Pulver Lane to Grandview Drive, and Broadway Street to where the sidewalk ends west of the roundabout.

North Santiam Paving Co. will begin construction June 17th, 2022. Sidewalk and drainage improvements will take place first from project start to mid-August 2022. Pavement repairs will be completed from mid-August to September 2nd, 2022. Gibson Hill Road will remain open to traffic with flagging during construction activities. Delays should be expected.

At your service,
every day.
